

## REFERENCE

2425394

## RELEASE DATE

November 2024

## SUBJECT

Data regarding water treatment dosing, phosphorous and/or phosphate measured at the consumers tap and leakage figures.

## REQUESTS & RESPONSES

1. *The quantities of Orthophosphate and/or Sodium Phosphate which have been added at water treatment plants Dunore Point, Moyola, Forked Bridge and Castor Bay for the years 2003 - 2023, or the years for which data is available. Broken down by year and treatment plant.*

The quantities of specific chemicals used at specific Water Treatment Works is considered lawfully exempt from disclosure under both Regulation 12(5)(a) and Regulation 12(5)(e) of the EIRs. Annexes A and B attached refer.

2. *The dosage rate/rates of Orthophosphate and/or Sodium Phosphate at each treatment plant Dunore Point, Moyola, Forked Bridge and Castor Bay for the years 2003-2023, or the years for which data is available.*

The dosage rate/rates of specific chemicals used at specific Water Treatment Works is considered lawfully exempt from disclosure under both Regulation 12(5)(a) and Regulation 12(5)(e) of the EIRs. Again, annexes A and B attached refer.

3. *The recorded values of phosphorous and/or phosphate at the consumers tap, serviced by the above water treatment plants.*

Annex C attached refers.

4. *The number of litres per day lost in the system due to leakage, for the years 2003-2023, or the years for which data is available.*

Annex D attached refers.

## Annex A

### *Regulation 12(5)(a) – national security and public safety*

Regulation 12(5)(a) of the EIR states that: “a public authority may refuse to disclose information to the extent that its disclosure would adversely affect— (a)international relations, defence, national security or public safety.”

This exception is subject to the consideration of the public interest. The Information Commissioner’s Office considers that information requested should be released unless the public interest weighs in favour of withholding such information.

The public interest in releasing the information requested is that it clarifies demonstrates NI Water’s willingness to be open and transparent in its processes.

Against this, detailed information about water treatment processes associated with specific works (to include chemical dosage within each plant) are considered highly sensitive as they relate to the supply of potable water.

There is a very real, not merely hypothetical, risk that the release of the requested details to the wider public could be useful for subversive activity to those with malicious intent. Accordingly, NI Water, acting as a prudent water undertaker, cannot responsibly place this information within the public domain via the EIR.

Protection of its citizens is the first duty of a government and, therefore, the release of any information that might make that task more difficult would not be in the public interest. Even if the risk of this happening were not considered very high, the consequences of such an event, if it did occur, would be so grave that NI Water is in no doubt that the balance of the public interest in this case falls clearly in favour of maintaining the exception rather than disclosing the information.

For the reasons detailed above, and in accordance with existing guidance pertaining to security considerations and public safety as it pertains to water and sewerage services infrastructure, NI Water has concluded that the public interest favours

withholding further information about the quantities of chemicals added to specific supplies.

## Annex B

### *Regulation 12(5)(e) - Confidentiality of commercial or industrial information*

This exception is also subject to the consideration of the public interest.

The public interest in releasing the information requested is that it clarifies demonstrates NI Water's willingness to comply with information access requirements.

Against this, NI Water has balanced the interest in protecting commercial information particularly where the disclosure of the information might undermine NI Water's ability to operate commercially in the future.

Under the legislation, disclosure to an individual is considered disclosure to the public at large and there is a very real risk the information sought would, if released to the wider public domain, have a detrimental impact on NI Water's commercial revenue or weaken the Company's position in a competitive environment by revealing market-sensitive information.

Providing a breakdown of the individual chemical cost and associated quantities per site will highlight a commercial issue by enabling calculation of the current supply cost per chemical.

As such, NI Water considers the public interest in maintaining the exemption outweighs the public interest in disclosing the information.
